Visit the central Voting Station in the linkway, and choose your favourite from the 7 winning plants. The Visitor Vote is announced on Thursday morning at 9.15am

Category	Trees		
Plant Name	Apple Rainbow (ERICS RAINBOW™)	Entry No.	NPS026
Entrant	Frank P Matthews Ltd	Stand No.	235 & 236
Breeder	Milan and Marijan Prepelic		
Description	A unique stripy apple!! Apple Rainbow has slightly variegated leaves with an attractive gold spot to the centre of each leaf and multi-coloured striated bark! This late picking apple has a red skin with green and pink stripes and snow-white non-browning flesh. This is a late season apple, ready to harvest in November, has crisp and tart flesh and a long shelf life, mellowing to become sweeter and lightly flavoured from January through to April. Apple Rainbow is also great in salads and for cooking due to it's non browning nature. Available on a selection of rootstocks to suit different sizes of garden, soil types and on dwarf rootstocks can be grown in pots. The flowers are fantastic for attracting bees and any apples that aren't wanted can be left for the birds so a great tree for nature. Bred by Milan and Marijan Prepelic, Croatia.		
Special features which benefit the consumer	A unique stripy apple!! Apple Rainbow has slightly variegated leaves with an attractive gold spot to the centre of each leaf and multi-coloured striated bark! This late picking apple has a red skin with green and pink stripes and snow white non-browning flesh. This is a late season apple, ready to harvest in November, has crisp and tart flesh and a long shelf life, mellowing to become sweeter and lightly flavoured from January through to April, an excellent late keeping apple. Apple Rainbow is also great in salads and for cooking due to it's non browning nature so is very versatile. Available on a range of rootstocks to suit all soils, sites and heights requirements, grown in pots or open ground and will grow easily in all parts of the UK. Early to mid-season flowering so will cross pollinate with the most apples.		
Additional remarks	Apple Rainbow has a very clean, smooth skin and good resistance to scab. No Phytophthora has been seen.

Category	Trees		
Plant Name	Prunus Sumaura Fugenzo JAPANESE LANTERN	Entry No.	NPS027
Entrant	Frank P Matthews Ltd	Stand No.	235 & 236
Breeder	n/a		
Description	This lovely sport of Prunus 'Fugenzo' first appeared on a tree in Suma-ura Park in Kobe, Japan in 1990. Flowering time and tree shape are similar to P. 'Fugenzo' but the flower colour and form is unique amongst all Sakura cherries. The flowers are quite spectacular, opening yellowish white/green which gradually turn shades of pink as they age. The flowers are borne about five per hanging corymb with most having 30 or more soft tissue like petals. A further attractive feature, displaying within the centre of the flower, are two leaf like pistils adding to the unique charm of this quite extraordinarily beautiful flowering tree. The flowers look like Japanese paper lanterns. The emerging double flowers appear with young coppery leaves which turn green as they age and then orange in the autumn. This variety will become a graceful spreading medium size tree. Absolutely stunning in flower!		
Special features which benefit the consumer	A very impressive Japanese flowering cherry. Stunning, densley double frilled flowers with white, pink and green petals that darken as they age. A medium size, spreading tree. Bronze young leaves turn green with age, good autumn colour. Absolutely stunning in flower! A good garden performer will grow in all regions of the UK and on all soil types except heavily waterlogged. Height and spread after 10 years		
Additional remarks	There are no known issues with pests and in particular observations show no susceptibility to black fly aphid. There is resistance to bacterial blossom and foliage infections along with frost resistance.

Category	Trees		
Plant Name	Pyrus (Pear) communis Cornishgold™		Entry No. NPS043
Entrant	Frank P Matthews Ltd.	Stand No.	235 & 236
Breeder	Kevin Hicks		
Description	<p>Cornishgold™ is a very special variety. The original tree is thought to be over 300 years old and is still producing pears today. Its fruit, though not a traditional dessert pear, holds a special charm. When ripened, it offers a mellow sweetness, making the most amazing, exquisitely tasting juice, each drop carrying the essence of its Cornish origins. The firm fruits are perfect for cooking, canning and other culinary delights and store well. Cropping in late September and will store until November. This, specific juicing pear, is also self fertile so no pollinating partners are needed and will crop reliably in even the most exposed sites. It was found in Launceston, Cornwall. This ancient tree, known as the Treburrow Pear, stands tall in the kitchen garden of a historic farmhouse, carrying within it centuries of care, cultivation, and tradition. In the autumn of 2015, this hidden treasure was brought to light. Dr. Joan Morgan, renowned pomologist at the Brogdale National Fruit Collection, was captivated by the beauty, uniqueness and mystery of the Treburrow Pear. After a careful examination, the fruit was sent for DNA testing. The results were as enchanting as the story itself—the Treburrow Pear was unlike any other known variety.</p>		
Special features which benefit the consumer	<p>This, specific juicing pear, is also self fertile so no pollinating partners are needed and will crop reliably in even the most exposed sites. Grown on a selection of rootstocks for different sites and soils.</p>		
Additional remarks	A healthy variety

Visit the central Voting Station in the linkway, and choose your favourite from the 7 winning plants. The Visitor Vote is announced on Thursday morning at 9.15am

Category	Trees		
Plant Name	Cercis canadensis Zig Zag®	Entry No.	NPS045
Entrant	Frank P Matthews Ltd.	Stand No.	235 & 236
Breeder	Plants Nouveau LLC Linda Guy		
Description	Cercis canadensis 'Zig Zag®' stands out from other redbuds with it's amazing zig zag pattern of branch growth giving the tree winter interest, 'Zig Zag®' features glossy green heart shaped leaves which turn brilliant shades of red and orange in the autumn. Deep fuchsia pea like pink flowers appear in spring before the foliage and increase as the tree matures. Grow in fertile, moist soil in full sun or partial shade. Can be pruned to size if needed. Height and spread 3x3m after 10 years. Can be grown as a multistem shrub or small tree.		
Special features which benefit the consumer	A quirky and unusual angular grower which is impressive in winter with the zig zag branch patterns, in spring the dark fuchsia colour pea like flowers heavily adorn the zig zag branches and in autumn the leave turn lovely orange and red colours. A tree for interest almost all year round. A small tree or large shrub. A good garden performer will grow in all regions of the UK and on all soil types except heavily waterlogged.		
Additional remarks	A healthy variety, no known pests or diseases

Category	Trees		
Plant Name	Malus Princess Heather	Entry No.	NPS075
Entrant	Allensmore Nurseries	Stand No.	13, 14, 15 & 16
Breeder	Pheno Geno		
Description	5.5L Columnar apple tree. A biological innovation that enables growing a large number of plants and achieving high yields on small areas. Columnar fruit trees are grown without support and regulates the optimum load by itself. They have superior attractiveness and fruit quality, red-coloured fruits and a narrow, moderately lush, upright stem that fills the space in the most beautiful way. Dwarf apple trees have a very attractive appearance and do not exceed a height of 1.5m, they produce abundantly, and the quality does not lag behind the same varieties grafted on standard rootstocks.		
Special features which benefit the consumer	Full sized fruit produced on a dwarf tree, columnar so takes up little space and can fit in any garden. Planting distance: 1.2 x 0.5 m.		
Additional remarks	A patio tree that can be grown in a pot or bed. Tolerant of all year-round weather conditions.

Plant Name	Escallonia laevis 'Pink Lemon'	Entry No.	NPS003
Entrant	Newey Ltd & Plantline BV	Stand No.	331, 341, 342 & 320 and 68 & 58
Breeder	Pépinnières Ladan sarl		
Description	Escallonia Pink Lemon is a standout shrub that adds vibrant colour and beauty to any garden. Its striking lime-green to golden-yellow leaves are visually stunning and incredibly sturdy, creating a bold and attractive display throughout the year. The glossy, resilient foliage perfectly complements the abundant, vibrant pink flowers that bloom richly in the summer and can have a rebloom in autumn. Escallonia Pink Lemon is a bee-friendly plant that supports local pollinators while adding a spectacle of colours to the landscape.		
Special features which benefit the consumer	This low-maintenance Escallonia is as tough as beautiful, thriving easily in various garden settings. Its naturally compact, dense growth habit requires minimal pruning and care, making it ideal for gardeners of all skill levels. Escallonia Pink Lemon provides year-round beauty and versatility, whether used as a low hedge, ground cover, in containers or as part of a larger landscape design. Its ability to adapt to various garden types and its vibrant colour make it an excellent choice for any landscaping need.		
Additional remarks	This low-maintenance Escallonia is as tough as beautiful, thriving easily in various garden settings. Its naturally compact, dense growth habit requires minimal pruning and care, making it ideal for gardeners of all skill levels. Escallonia Pink Lemon pro

Plant Name	Syringa meyeri Little Rosie	Entry No.	NPS004
Entrant	Newey Ltd	Stand No.	331, 341, 342 & 320
Breeder	André van Nijnatten		
Description	As chipper as her name suggests, Syringa Little Rosie wows you with her vivid dark pink fragrant flowers and compact habit. Syringa Little Rosie stands out with darker leaves than most Syringa in the range, and her short branches make for a very compact habit. The dark pink foliage looks wonderful throughout summer and autumn but creates an especially wonderful scene once combined with the fragrant cherry-pink flowers that appear in springtime.		
Special features which benefit the consumer	Little Rosie is a very compact Syringa that requires little maintenance other than a quick prune after flowering if desired. Little Rosie prefers a spot in well-drained soil in full sun to semi-shade and is hardy up to -28 °C.		
Additional remarks	Little Rosie is a very compact Syringa that requires little maintenance other than a quick prune after flowering if desired. Little Rosie prefers a spot in well-drained soil in full sun to semi-shade and is hardy up to -28 °C.

Plant Name	Abelia chinensis Golden Dragon	Entry No.	NPS005
Entrant	Newey Ltd	Stand No.	331, 341, 342 & 320
Breeder	TCVC HOLDINGS LTD		
Description	Bring the sunshine with Abelia Golden Dragon! This abelia boasts gorgeous golden young foliage which matures to a light green. But the golden colour remains in the flower sepals, which retain ornamental value even once the pale pink flowers eventually fall after their long flowering season. Flowers have light fragrance which have notes of Jasmin. An easy to grow variety with good vigour.		
Special features which benefit the consumer	Can be grown in large patio containers or in the garden border. Golden Dragon prefers are full sun to partial shade location and ideally in a moist but well-drained soil.		
Additional remarks	Good disease resistance due to strong plant habit / growth.

Plant Name	Clematis Baroness Fookes™	Entry No.	NPS033
Entrant	The Guernsey Clematis Nursery Ltd, Raymond Evison Clematis	Stand No.	43
Breeder	Raymond J Evison Ltd		
Description	Along with other new introductions to be added to the Raymond Evison Clematis Brand for 2025, is Clematis Baroness Fookes™ EviGsy156(PBR), which comes from 2014 Guernsey Breeding Programme that concentrated on bringing to market, compact, free-flowering and repeat flowering plants. Clematis Baroness Fookes™ EviGsy156(PBR) delivers these principles extremely well, with plentiful blooms from May through to July and again in late summer, via its extremely free-flowering nature and successional sets of flower buds. The blooms are purple/blue with a darker purple bar, Light-brown anthers and measure 12-14cm. Dense foliage of mid to deep green, sets a perfect backdrop for these delightful ruffled-edged blooms. Overall height is 90-120cm. A wonderful addition to a patio, in a container, or in the mid to front of a flower border, where it's longevity of successive flowers can be fully appreciated.		
Special features which benefit the consumer	Easy to grow, easy to prune, very free blooming and repeat blooming. Will fit any garden.		
Additional remarks	We are pleased to release this captivating large-flowered clematis, in honour of Janet Evelyn Fookes, Baroness Fookes DBE DL, who in 2023 was one of the first people to be awarded the new Royal Horticultural Society award, the Elizabeth Medal of Ho

Plant Name	Clematis Bridgewater™	Entry No.	NPS036
Entrant	The Guernsey Clematis Nursery Ltd, Raymond Evison Clematis	Stand No.	43
Breeder	Raymond J Evison Ltd		
Description	A delectable soft pink, star-shaped bloom, with complementary chocolate-brown anthers, of generous proportions, 12-14cm, cover the plant from May to July and again in September. Flowers profusely down the stems giving excellent flower coverage over the fully height of the plant. A very full, bushy plant, height 90-120cm. Simple pruning technique, cut back to 6" (15cm) in late winter/spring, will produce a captivating display, year, after year. Grow in a container or front to mid flower border on a obelisk or growing through other plants.		
Special features which benefit the consumer	Easy to grow, easy to prune, very free blooming and repeat blooming. Will fit any garden.		
Additional remarks	Clematis Bridgewater™ EviGsy155(PBR) was selected by Sue Biggs CBE, the former Director General of the Royal Horticultural Society to commemorate the RHS's fifth public display garden, RHS Garden Bridgewater, in the 154 acre site of former Worsley New Hall Estate in Salford, Greater Manchester, England. You will find a plant at each of the Royal Horticultural Society public display gardens.

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Clematis Elpis™	Entry No.	NPS038
Entrant	The Guernsey Clematis Nursery Ltd, Raymond Evison Clematis	Stand No.	43
Breeder	Raymond J Evison Ltd		
Description	A rounded shaped, deep rich red flower, 10-12cm across, with contrasting yellow anthers. Flowers freely from May through to July, with reliable repeat flowering into September. The blooms also hold the colour very well with little or no fading. With its compact habit and height of 90-120cm, Elpis would make a wonderful addition to a patio, in a container, or in the mid to front of a flower border, where it's longevity of successive flowers can be fully appreciated. The modern clematis in the Raymond Evison collection flower readily and will yield good results using relatively simple pruning techniques. In late winter/early Spring simply reduce all stems down to 6" (15cm) of soil level.		
Special features which benefit the consumer	Easy to grow, easy to prune, very free blooming and repeat blooming. Will fit any garden.		
Additional remarks	The breakthrough with Clematis Elpis™ EviGsy154(PBR), is not just the plentiful wonderful blooms but the outstanding foliage, which is vibrant and strong, which is the perfect backdrop for the rich red blooms. Why Elpis? We have named this clematis in association with two amazing charities, MUG (Male Uprising Guernsey), whose aim is to increase awareness of male cancers and to help those who are affected by prostate, bowel and testicular cancer on the island of Guernsey, and Prostate Cancer Research (PCR), a patient-centric research and information provision charity dedicated to improving and saving the lives of people with prostate cancer. . Working with MUG and PCR we will release Clematis Elpis™ EviGsy154(PBR) at the 2025 RHS Chelsea Flower Show, alongside Clematis Bridgewater™ EviGsy155(PBR) and Clematis Baroness Fookes™ EviGsy156(PBR), 'Elpis' is the Greek Goddess or spirit of hope and was depicted as a young woman, carrying flowers.

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Hydrangea paniculata Gardenlights 'Littlelight' ®	Entry No.	NPS039
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Kwekerij Lendert de Vos		
Description	Hydrangea paniculata Gardenlights Littlelight® is a compact, hardy shrub reaching 0.4-0.5m height and spread. Growers supply it as a plug or 3L pot, ideal for spring planting. Best grown at moderate temperatures with standard care; no special support or stitching needed. For consumers, it flowers summer into early autumn with a profusion of upright, luminous panicles. It attracts pollinators like bees and butterflies. Exceptionally hardy (down to -20°C), it thrives in full sun to partial shade and prefers moist but well-drained soil. Compact size makes it perfect for pots, beds, and small gardens, creating a sea of flowers without sprawling.		
Special features which benefit the consumer	Gardenlights Littlelight® combines beauty with low maintenance. It's ideal for small gardens, patios, and containers, offering a spectacular floral show without sprawling. Strong branches keep blooms upright, even after rain, meaning no flopping flowers. Its compact, neat form requires little pruning—just a light cut in early spring. It's hardy and tough, thriving in UK gardens with minimal care. Suitable for full sun to partial shade and most well-drained soils, making it adaptable and easy for any gardener to succeed with.		
Additional remarks	Littlelight® shows good resilience against common pests and diseases affecting hydrangeas, thanks to its sturdy growth and healthy foliage. Its strong, weatherproof branches reduce damage from wind and rain. Perfect for modern small gardens, it excels in

## Vote for Your Favourite New Plant

Visit the central Voting Station in the linkway, and choose your favourite from the 7 winning plants. The Visitor Vote is announced on Thursday morning at 9.15am

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Hydrangea arborescens 'FlowerWOW'	Entry No.	NPS040
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Bailey Nurseries		
Description	Hydrangea arborescens 'FlowerWOW' lives up to its name with breathtaking, dense, rounded blooms resembling large snowballs. These are held high on strong, weather-resistant stems that remain upright even in wind and rain. This variety produces significantly more flowers than comparable cultivars, often covering the foliage entirely. It also boasts improved resistance to foliar diseases and is ideal for borders, containers, or as a specimen plant.		
Special features which benefit the consumer	Exceptionally floriferous with repeat blooming Strong, upright stems that resist flopping Improved disease resistance Compact growth habit ideal for patios, borders, and containers Tolerates sun to semi-shade Hardy and low-maintenance		
Additional remarks	Hydrangea 'FlowerWOW' is perfect for use in cottage gardens, woodland borders, or as a patio feature. It thrives in moist, fertile, non-alkaline soil and benefits from regular watering. Leave faded blooms over winter to protect new buds from frost.

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Camellia japonica L. Femme Fatale	Entry No.	NPS049
Entrant	Garden Centre Fresh	Stand No.	237 & 241
Breeder	Snepvangers Tuinplanten		
Description	Camellia Femme Fatale® is a unique Camellia with an aesthetic that one could only describe as 'passionate'. This beautiful Camellia boasts glossy dark green foliage decorated with burgundy red new shoots. All gathered in an upright, bushy habit. When spring announces itself, Femme Fatale® will delight with showy and large dark red, double flowers which combine beautifully with the dark green and burgundy foliage. As an evergreen shrub, Femme Fatale® will provide year-round interest and is hardy enough for most hardiness zones; she will add some much-needed flair to autumn and winter landscapes.		
Special features which benefit the consumer	This Camellia will provide year-round colour in the garden		
Additional remarks	Camellia Femme Fatale® is perfectly suited for containers and borders and can tolerate sun but prefers a spot in the partial shade. She doesn't require much maintenance but would appreciate some fertilizer in spring and summer. Femme Fatale® grows up to 1

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Hydrangea Macrophylla Doppio Fredo	Entry No.	NPS058
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Lendert de Vos		
Description	Hydrangea macr. Doppio® Fredo is a stunning white double-flowered variety that thrives best in partial shade. This unique Hydrangea combines compact growth with firm, long-lasting blooms and strong branching, making it a highly desirable choice for both growers and consumers. Doppio® Fredo blooms abundantly from June through September, with flowers remaining in full display for over 100 days. During this flowering period, the plant maintains a modest height of around 60 cm, making it ideal for container use or small gardens.		
Special features which benefit the consumer	Hydrangea macr. Doppio® Fredo offers outstanding benefits for commercial growers. Its double, sterile flowers ensure clean presentation and no seed drop, while every branch blooms, guaranteeing rich and repeat flowering. Compact growth reduces the need for growth regulators, and strong, upright stems eliminate the use of support sticks. The plant is winter hardy to -20°C and shows excellent flower firmness, with a long shelf life of over 100 days. Autumn color adds seasonal value. With a standard cultivation time of just 12 weeks, Doppio® Fredo combines beauty, strength, and efficiency—ideal for both pot and garden production.		
Additional remarks	Hydrangea macr. Doppio® Fredo is generally pest- and disease-resistant, bred for durability. Its strong stems, compact growth, and minimal maintenance needs make it a perfect choice for gardeners seeking beauty, reliability, and low effort.

Plant Name	Hydrangea Macrophylla Doppio Rosato	Entry No.	NPS059
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Lendert de Vos		
Description	Hydrangea macr. Doppio® Rosato is a stunning pink double-flowered variety that thrives best in partial shade. This unique Hydrangea combines compact growth with firm, long-lasting blooms and strong branching, making it a highly desirable choice for both growers and consumers. Doppio® Rosato blooms abundantly from June through September, with flowers remaining in full display for over 100 days. During this flowering period, the plant maintains a modest height of around 60 cm, making it ideal for container use or small gardens.		
Special features which benefit the consumer	Hydrangea macr. Doppio® Rosato offers outstanding benefits for commercial growers. Its double, sterile flowers ensure clean presentation with no seed drop, while every branch blooms for rich, repeat flowering. Compact growth reduces the need for growth regulators, and strong, upright stems eliminate support sticks. Flower color varies—blue in acidic and pink in alkaline soil. The plant is winter hardy to -20°C, with excellent flower firmness and a shelf life of over 100 days. Autumn color adds seasonal value. With a standard cultivation time of 12 weeks, Doppio® Rosato combines beauty, strength, and efficiency for both pot and garden production. Hydrangea macr. Doppio® Rosato is a compact, double-flowered variety that blooms abundantly from June to September. With a maximum height of 60 cm, it's ideal for small gardens, borders, containers, or as a standalone feature. The plant thrives in moist, well-drained soil and prefers morning sun with afternoon shade. Its long-lasting, sterile flowers stay beautiful for over 100 days—perfect for floral arrangements without creating a mess. Depending on soil pH, flowers appear blue in acidic and pink in alkaline conditions. Doppio® Rosato is strong, low maintenance, and winter hardy. Prune in early spring just above new buds for optimal blooming.		
Additional remarks	Hydrangea macr. Doppio® Rosato is generally pest- and disease-resistant, bred for durability. Its strong stems, compact growth, and minimal maintenance needs make it a perfect choice for gardeners seeking beauty, reliability, and low effort.

Plant Name	Hydrangea hybride 'Million Stars Sirius Blue'®	Entry No.	NPS069
Entrant	Javado UK	Stand No.	220 & 227
Breeder	HOKO Breeding		
Description	Supplied P14cm for repotting to a bigger P23cm/5 litre pot. Temperature must be above 15°C to flower. The flowers attract bees & butterflies. Plant is winterhardy till -10°C. Compact growing maximum 100cm in the garden. Light condition is half sun half shade, needs a lot of water especially when it is in bloom. Suitable for garden, pots & beds.		
Special features which benefit the consumer	The structure of this unique Hydrangea Million Stars is compact and well-branched and in the garden the plant also remains beautifully compact. The special thing about the screen-shaped star flowers is that they are reminiscent of the graceful elegance of serrata, but the flower size and the rich flowering come from macrophylla. Because it is such a clear and unique mix of these species, we call it a Hydrangea hybrid.		
Additional remarks	Use of Hydrangea in the garden 1. Solitary plant (as an eye-catcher) Place a large Hydrangea bush in a prominent place in the border or front garden. Ideal as an eye-catcher due to the rich flowering in summer and late summer. 2. In groups or hedges Plant several Hydrangeas in a row for a lush and colorful border or low hedge. Popular for informal gardens or as a property boundary.

Plant Name	Rosa x hybrida Scentifall® Blush	Entry No.	NPS113
Entrant	Farplants Sales Ltd	Stand No.	284 & 291
Breeder	Thompson & Morgan		
Description	<p>Rosa Scentifall™ Blush introduces a novel approach to enjoying the timeless beauty and fragrance of roses, specifically tailored for modern gardening needs and smaller spaces. This exceptional new cultivar stands out as a fragrant, very pale blush pink rose with a distinctive arching and semi-trailing habit, making it ideally suited for hanging baskets, window boxes, and elevated containers – a relatively new focus in rose breeding.</p> <p>Unique Selling Points: A sweet and delicate floral rose scent – with a growth habit perfectly adapted for container gardening, particularly hanging baskets. This allows gardeners to experience the joy of highly fragrant roses even in the most limited spaces, bringing the scent closer to enjoyment. Repeat blooming when spent flowers removed.</p>		
Special features which benefit the consumer	<p>Delightful Perfume: Provides an enjoyable fragrance, enhancing the sensory experience.</p> <p>Watering: Needs consistent watering, especially when grown in containers, to prevent drying out.</p> <p>Well-Drained Soil: Plant in well-drained potting mix or garden soil to prevent waterlogging.</p> <p>Feeding: Benefits from regular feeding with a balanced rose fertilizer during the growing season to encourage healthy growth and abundant blooms. This Rose has proved to have good disease resistance in trials and production. Pruning: Light pruning to remove spent flowers (deadheading) will encourage more blooms. More significant pruning can be done in late winter/early spring to maintain shape and vigour.</p> <p>Hardiness: While expected to be reasonably hardy in typical UK winters, container-grown roses may benefit from some protection during exceptionally severe frosts.</p>		
Additional remarks	Rosa Scentifall™ Blush offers gardeners a delightful combination of a clean fragrance and a naturally cascading growth habit that excels in hanging baskets and patio containers. This Rose has proved to have good disease resistance in trials and producti

Plant Name	Vitex agnus-castus 'Queen Bee'	Entry No.	NPS116
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Bailey Nurseries		
Description	Vitex agnus-castus 'Queen Bee' is a compact, flowering shrub selected for its impressive upright flower spikes, rich lavender-purple blooms, and refined, aromatic foliage. A magnet for pollinators, 'Queen Bee' is a breakthrough in the Vitex family for its shorter, more manageable size, making it suitable for smaller gardens and patios. Flowering from midsummer into early autumn, it provides bold, bee-friendly color and fragrance when few other shrubs are in bloom. It thrives in sunny locations and is heat- and drought-tolerant once established.		
Special features which benefit the consumer	Fragrant lavender-purple flowers Long blooming period (mid-summer to early autumn) Compact habit ideal for urban gardens and containers Highly attractive to bees, butterflies, and pollinators Aromatic grey-green foliage Heat and drought tolerant Low-maintenance; thrives in well-drained soil in full sun Deer and rabbit resistant		
Additional remarks	'Queen Bee' is excellent for mixed borders, pollinator gardens, xeriscaping, and Mediterranean-style planting schemes. It is pest and disease resistant and handles dry conditions well once established. Plant in full sun with well-drained soil. It can also

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Salix sp. 'Iceberg Alley'®	Entry No.	NPS117
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Bailey Nurseries		
Description	Salix Iceberg Alley® is a compact, hardy shrub willow with eye-catching powdery silver foliage that holds its color throughout the growing season. Soft, fuzzy, silver catkins appear in spring before the leaves emerge, adding early interest. This cultivar has a rounded, mounding habit, making it perfect for modern landscapes, low hedges, or container displays. 'Iceberg Alley' thrives in full sun and tolerates a wide range of soils, including moist or clay conditions.		
Special features which benefit the consumer	Striking silver foliage from spring through autumn Fuzzy silver catkins in early spring Naturally rounded and compact growth (no hard pruning needed) Extremely cold-hardy and adaptable Tolerates moist or clay soils Great for borders, low screens, containers, or accent planting Deer and rabbit resistant Low-maintenance and water-wise once established		
Additional remarks	Iceberg Alley® is ideal for mass planting, contrast foliage design, or container use. It handles wet or heavy soils and performs well even in colder climates. Pest and disease resistance is excellent compared to traditional willows. In spring, it offers c

Category	Shrubs (including Conifers) & Climbers		
Plant Name	Passiflora incarnata Cooltropics® 'Eia Popeia'®	Entry No.	NPS124
Entrant	Darby Nursery Stock Ltd & Baldwin's Nursery	Stand No.	349 & 360 and 311
Breeder	Lubera		
Description	<p>Fruit-bearing varieties of passion flowers, <i>Passiflora edulis</i>, can be grown in the UK, but are generally regarded as container plants that enjoy a 'summer holiday' in the garden, returning indoors during the winter if they are to survive. Passion fruit Cooltropics® 'Eia Popeia'® is a fabulous new edible ornamental, with simply gorgeous blue-violet flowers, followed by tasty edible fruits, but with clever breeding giving rise to true winter hardiness, making them perfect for the UK climate. Very robust, they can withstand both intense heat in summer and heavy frosts in winter down to -15°C. Behaving like a classic perennial, the shoots die back in winter but regrow from the rootstock again each spring. Flowering from June to October with exotic flowers and a delicate fragrance, fruits are green, the size of an egg, and are harvested from September to November when they turn yellow. Their excellent flavour is typical of passion fruit, aromatic and deliciously tart. A real gamechanger in the world of passionflowers – winter hardiness to give tasty fruits after rich flowering, every year.</p>		
Special features which benefit the consumer	<p>Plants sprout again from the rootstock in May and are therefore hardy to around -15°C. Plants need a trellis or wires to climb up. In late autumn, simply cut back the above-ground part to 10 cm. Quickly grows to a considerable size and can be used as an exotic flowering and fruit-bearing screen in the summer. Tasty and aromatic fruits form until September, provided that there is sufficient fertilisation by a second variety.</p>		
Additional remarks	As above.

Plant Name	Hydrangea macrophylla 'Arctic Circle'	Entry No.	NPS138
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	De Jong Plant BV		
Description	Hydrangea macrophylla 'Arctic Circle' is a uniquely symmetrical, compact-growing variety with pristine, pure white lacecap blooms. The plant features lush, dark green foliage and offers excellent structure and visual appeal in both container and garden settings. With strong, upright stems and long-lasting flowers, it delivers high ornamental value throughout the season. Fertile, bee-friendly flowers provide ecological value, while its elegant color transitions—from bright white to subtle soft hues—ensure continuous seasonal interest.		
Special features which benefit the consumer	Compact and upright growth habit Uniquely symmetrical structure Pure white lacecap blooms with soft seasonal color transitions Ideal for borders, patio containers, or as a standalone garden specimen Bee-friendly fertile flowers Lush dark green foliage for excellent contrast Hardy, low-maintenance, and tolerant of semi-shade		
Additional remarks	Hydrangea 'Arctic Circle' thrives in moist, well-drained, non-alkaline soil and prefers partial shade to full sun. Its strong stems support the large, airy blooms well—even in rain. It is an excellent choice for use in cottage gardens, elegant urban lands

Plant Name	Rosa Coral Gardens 'KORzwanlio'	Entry No.	NPS146
Entrant	Whartons Garden Roses	Stand No.	347 & 362
Breeder	Kordes Rosen		
Description	<p>Bred by renowned German breeder Kordes Rosen, Coral Gardens® has been selected as Rose of The Year 2026, it outperformed the competition in 2-year trials conducted throughout the UK and judged by a panel of growers, breeders and rose enthusiasts. It is set to launch in autumn 2025, available bare root and in a 3L container for autumn, spring, and summer sales. This repeat-flowering Floribunda rose produces clusters of semi-double blooms in an on-trend salmon-orange hue. The vibrant flowers show exceptional weather resistance, thriving through the UK's unpredictable summers—whether rainy, humid, hot, or dry. Its dark green, glossy foliage offers outstanding disease resistance, enhancing both the plant's beauty and resilience. With a compact, upright habit (H: 80cm, W: 60cm), Coral Gardens® is ideal for the middle of a mixed border or a large patio container. From 2019 to 2022, Coral Gardens® earned accolades in prestigious international rose trials, including awards in Adelaide, Courtrai, Le Roeulx, Lyon, The Hague, and Warsaw—proving its exceptional performance in diverse and challenging climates. A rose bred not just for today, but for the future.</p>		
Special features which benefit the consumer	Blooms repeatedly from early summer into autumn. Ideal for mixed borders or patio pots. Thrives in well-drained soil and prefers a sunny position.		
Additional remarks	Outstanding disease resistance, happy in a mixed border or patio pot, continuous colour through summer into autumn, weather resistant blooms

Plant Name	Rosa Darling 'Noa118723'	Entry No.	NPS147
Entrant	Whartons Garden Roses	Stand No.	347 & 362
Breeder	Noack Rosen		
Description	Bred by German breeder Noack Rosen, Rose Darling® is a charming Floribunda rose launching in autumn 2025. It will be available bare root and in a 3L container for autumn, spring, and summer sales. This elegant rose produces clusters of soft pink, lightly scented blooms that flower repeatedly from summer well into autumn. The lush, glossy green foliage emerges with a distinctive reddish tint in spring, adding early-season interest. Compact and free-flowering, Darling® is an excellent choice for patio planters, mixed borders, or as a thoughtful living gift. It pairs beautifully with lavenders and salvias for a classic cottage garden aesthetic. In 2024, Darling® received the prestigious Golden Rose Award at the renowned Baden-Baden rose trials—testament to its exceptional performance, beauty, and reliability.		
Special features which benefit the consumer	Free flowering from early summer into autumn. Thrives in well-drained soil and performs best in a sunny position		
Additional remarks	Good disease resistance, easy to place in a mixed border or patio pot

Plant Name	Rosa Sweet Romantica®	Entry No.	NPS148
Entrant	Whartons Garden Roses	Stand No.	347 & 362
Breeder	Meilland International		
Description	Bred by the acclaimed French breeder Meilland, Rose Sweet Romantica® will be available from autumn 2025 as a bare root plant and in a 3L container for autumn, spring, and summer sales. This exquisite Hybrid Tea rose has a powerful, floral fragrance. Large, fully double pink blooms reveal a warm apricot centre and are produced in abundance from early summer through to autumn, on strong, upright stems—making it a standout choice for cutting. With a compact habit, Sweet Romantica® is perfectly suited to patio pots, yet holds its own in mixed borders. High petal count, repeat flowering, and irresistible scent combine to provide a rose that has elegance and mass appeal.		
Special features which benefit the consumer	Good for cutting, powerful fragrance, ideal for mixed borders or patio pots. Thrives in well-drained soil and prefers a sunny position.

Plant Name	Veronica gentianoides Walberton's® Spring Breeze	Entry No.	NPS082
Entrant	The Farplants Group	Stand No.	284 & 291
Breeder	Walberton Plants Limited		
Description	<p>Veronica Walberton's® Spring Breeze is a distinctive and well-structured cultivar, offering a combination of ornamental value, garden resilience, and commercial versatility. It forms a dense, low-growing mat of dark, lustrous foliage that provides excellent ground coverage and year-round interest. In late spring, upright stems emerge, carrying a profusion of soft violet blue flower spikes that rise cleanly above the foliage. A key unique selling point of Spring Breeze is its adaptability. It performs reliably in a wide range of conditions, showing excellent hardiness and tolerance to both cold and periods of heat or drought once established. Its compact, tidy habit makes it ideal for small gardens, and modern landscape schemes where space and structure are critical. In addition to its aesthetic and structural strengths, Spring Breeze offers ecological benefits. The nectar-rich flowers are attractive to a range of pollinators, can tolerate both sunny borders and lightly shaded sites. Whether used in mass planting, mixed perennial displays, or as a standout container feature, Veronica Walberton's® Spring Breeze combines visual impact with robust garden performance and ecological value—making it a worthy candidate for industry recognition.</p>		
Special features which benefit the consumer	<p>Attractive lustrous foliage. Soft violet blue flowers—contrast beautifully with the foliage for strong visual appeal. Low maintenance – easy to grow, with good drought tolerance once established. Versatile – ideal for borders, containers, or ground cover in full sun or partial shade. Pollinator-friendly.</p>		
Additional remarks	<p>Versatile in the garden – ideal for borders, edging, gravel gardens or under planting shrubs. Thrives in sun or partial shade, with good drought tolerance once established.</p>

Breeder	Eyco		
Description	The beautiful flowers consist of a funnel-shaped rolled calyx leaf, with an overhanging flared tip. With a light yellow spadix in the calyx. Elegant traditional crisp white. This makes it ideal for modern containers and cut flowers or garden displays. The blooms are long-lasting, persisting for a few weeks. They are tidy growers, remaining uniform and compact, making them perfect for patios, borders and seasonal displays. They are very container friendly, thriving in pots with good drainage.		
Special features which benefit the consumer	Long lasting flowers. Excellent as cut flowers and for garden displays. More compact than traditional varieties. Excellent for container growing and in borders. Requires moist, well-drained soil. Thrives in full sun to partial shade.		
Additional remarks	Regular feeding and watering are essential during the growing season. They are highly versatile in the garden (containers, mixed borders, cut flower beds).

Category	Herbaceous Perennials		
Plant Name	Punica granatum Uniqua	Entry No.	NPS098
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Outback Plants		
Description	Punica 'Uniqua' grows up to 40 cm high and wide and prefers a spot in full sun or partial shade in fertile, well-drained soil. Punica 'Uniqua' is hardy up to -8 °C.		
Special features which benefit the consumer	With its compact, rounded growth habit, Punica 'Uniqua' is perfect for modern or Mediterranean landscapes, rockeries, decorative planters, and small garden spaces. Its manageable size makes it ideal for urban gardens, patios, and balconies, effortlessly bringing warmth and vibrancy to any setting. If you're looking for a unique, low-maintenance shrub that offers season-long beauty and an authentic Mediterranean feel, Punica 'Uniqua' is an outstanding choice.		
Additional remarks	These striking blooms persist for an extended period before giving way to miniature, inedible ornamental fruits in autumn, adding yet another layer of decorative interest.

Category	Herbaceous Perennials		
Plant Name	Achillea millefolium Color Burst 'Red' (P)	Entry No.	NPS099
Entrant	Kernock Park Plants Ltd	Stand No.	254 & 261
Breeder	Plantipp BV		
Description	'Color Burst Red' is an amazing new Achillea, which has been selected for stunning flower colour and very compact habit – making for outstanding container performance. Vivid, plentiful blooms sit neatly atop fine feathery foliage. A cottage garden classic that is ideal for small modern gardens and container culture.		
Special features which benefit the consumer	The cultivar is quick to fill containers, despite the compact habit, meaning relatively short production cycles are possible. No pruning is required for pot-fill to occur. The height of the plant means that delivery to retailers is cost-effective.		
Additional remarks	A truly bijou Achillea – so floriferous that it 'pops' with zingy colour making a big splash all summer long! It mixes brilliantly with a wide range of other colourful container plants, making for great displays.

Category	Herbaceous Perennials		
Plant Name	Euphorbia Walberton's® Little Treasure®	Entry No.	NPS102
Entrant	The Farplants group	Stand No.	284 & 291
Breeder	Walberton Plants Limited		
Description	A captivating new cultivar distinguished by its exceptionally fresh, zesty chartreuse foliage that provides a vibrant and eye-catching presence from spring through autumn. Its habit is notably super compact and consistently bushy, forming an attractive, well-rounded mound, making it a striking impulse plant with an inherently neat and tidy appearance. Offering a long period of seasonal interest, the bright foliage is further enhanced by the development of long-lasting, equally vibrant chartreuse bracts, creating a prolonged and impactful floral display. While specific hardiness trials are ongoing, its parentage suggests a good level of hardiness, likely comparable to other Euphorbia martinii types, indicating resilience to typical UK winter conditions when planted in well-drained soil		
Special features which benefit the consumer	Vibrant, Long-Lasting Foliage Colour: The fresh, zesty chartreuse foliage provides continuous bright colour from spring through autumn, offering extended visual interest beyond just a flowering period. The unique copper tones in cooler weather add an extra layer of seasonal appeal. Super Compact and Neat Habit: Its consistently small and bushy form makes it ideal for small spaces, the front of borders, and creating tidy displays. This manageable size is appealing for gardeners with limited room or those who prefer a more formal look. Long-Lasting Bracts: The chartreuse bracts persist for an extended period, providing a prolonged and impactful floral display, effectively lengthening the "flowering" season in terms of visual impact. Excellent Suitability for Container Growing: Its compact size and eventual drought tolerance make it perfect for adding vibrant colour and structure to patios, balconies, and mixed container arrangements. Drought Tolerant Once Established: This reduces the need for frequent watering, saving time and effort for the consumer		
Additional remarks	A resilient and adaptable plant. Its bright foliage, compact habit and drought tolerance make it versatile for various garden applications.

Plant Name	Salvia x jamensis 'Cream Soda'®	Entry No.	NPS115
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Rijnbeek Perennials		
Description	Salvia 'Cream Soda'® is a unique and elegant addition to the jamensis group, discovered in the Netherlands and gifted to Rijnbeek Perennials in celebration of their 80th anniversary. Its name is inspired by the soft, creamy-white flowers tinged delicately with blush-pink – a fresh and uplifting colour combination not commonly seen in salvias. This variety has undergone years of testing for hardiness and performance, and is now proven to deliver strong garden value. It flowers generously from late May until nearly Christmas, offering a long-lasting display of beauty and interest.		
Special features which benefit the consumer	Exceptionally long flowering period (late May–December) Unique creamy-white and blush pink flowers Compact and manageable size (70 cm tall) Aromatic foliage Attracts bees and pollinators Hardy to -10°C in well-drained soil Ideal for sunny borders, gravel gardens, and containers Low-maintenance and drought tolerant once established		
Additional remarks	Salvia 'Cream Soda'® performs best in full sun and well-drained soil. It is drought tolerant once established and relatively pest- and disease-free. Its upright, bushy habit and extended blooming season make it an excellent choice for borders, mixed peren

Category	Herbaceous Perennials		
Plant Name	Hosta 'Party Streamers'	Entry No.	NPS119
Entrant	Darby Nursery Stock Ltd	Stand No.	349 & 360
Breeder	Hans Hansen		
Description	<p>Hosta 'Party Streamers' is the result of an extensive Hosta breeding program by Hans Hansen of Walters Gardens, which began in 1993. Each year between 500 and 700 different set of hand pollinated crosses are performed multiple times to ensure the full range of genetic diversity. The resulting seedlings are grown, observed and evaluated for distinction, vigour, attractiveness and market potential for many, many years. 'Party Streamers' lives up to its name with distinctive narrow golden leaves, wiggly with attractive ruffled edges so it appears it is always in motion. Deep purple flowers on tall stems are attractive to both gardeners and pollinators, and contrast beautifully with the foliage when they bloom in mid to late summer. Hardy throughout the UK. Unaffected by heavy rain or strong winds, and in shady areas, drought tolerant, Hosta are perfect for full or part shade. Narrow leaves are less affected by hailstorms, which would normally ruin a larger leaved Hosta for the rest of the season. Vigorous growth and excellent pot performance make this cultivar excellent for container growing. Definitely a Hosta to celebrate!</p>		
Special features which benefit the consumer	<p>Gold Hostas bring excitement and drama to shady areas, like a spot of sunshine. Hosta 'Party Streamers' is the perfect combination of vigour, flowers, and attractiveness. Perfect for both pots and herbaceous borders. Best grown in moist but well drained soils rich in organic matter. Happiest in shady, woodland settings, just position out of strong midday and afternoon sunlight. Minimal care required – a very low maintenance perennial that can be grown in even the smallest gardens, including inner city courtyards and even shady balconies.</p>		
Additional remarks	<p>Hostas are exceedingly popular perennials in today's gardens due to their versatility in the landscape. Their leaves provide excellent coverage for dying bulb foliage.</p>

Category	Foliage Houseplants		
Plant Name	Tamarindus Indica "Tamarinde"		Entry No. NPS009
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Ten Have Plant		
Description	The Tamarind (Tamarindus indica) is a slow-growing, tropical potted plant with elegant, feathery foliage that opens during the day and closes at night. It can grow up to 2 meters indoors and prefers a sunny location. It tolerates dry conditions well and requires minimal care, making it ideal for indoor plant lovers. Outdoors, it can be placed on a terrace or balcony during summer months but should be brought indoors when temperatures drop below 10°C. The Tamarind is suitable for pots and can also thrive in beds in warm climates. Attractive for its unique leaf movement and tropical look.		
Special features which benefit the consumer	Tamarind is a unique potted product newly introduced in the Dutch market by Ten Have Plant. It is a sustainable plant with long life expectancy, low maintenance needs, and excellent drought tolerance, reducing the need for constant care. Plants are supplied with branded packaging and optional decorative containers, such as baskets or wooden pots. Its robust nature and visual appeal make it a commercially attractive and durable addition to the product range.		
Additional remarks	Tamarind is naturally resistant to most pests and diseases. Its rhythmic leaf movement adds life to indoor spaces. It can be pruned to maintain desired size and shape. The plant thrives with minimal effort, making it perfect for busy households. Whether p

Category	Foliage Houseplants		
Plant Name	Hoya callistophylla	Entry No.	NPS061
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Hordijk Plants		
Description	The Hoya callistophylla KAL 16 is a houseplant and not an outdoor plant. The leaves are bright green with dark green veining. The plant is a slow grower, suitable for container growing. The plant is originally a climber. As houseplants, you can encourage them to climb, but they also look great in a hanging basket. The plants is known for its beautiful leaves, it rarely flowers. The plug size supplied is 15 cm. The plant is non-toxic to humans and animals, which makes it suitable for households with kids and/or pets.		
Special features which benefit the consumer	The Hoya callistophylla KAL 16 is odourless. Breathable pots with drainage are recommended. The vines can reach over 1 meter indoors. The ideal temperature range is 18 – 26 °C. The plants prefers bright, indirect light. Too much direct sun can scorch the leaves. When the top is 2 – 3 cm dry, it's time wo water. The frequency depends on the temperature: when it's hot and dry you should water the plant 3 – 5 times in a week. When it's cool and low light weather, you should water the plant once every 7 – 14 days.		
Additional remarks	The plant is susceptible to mealybugs and spider mites. Treat early with neem oil, insecticidal soap or biological options.

Plant Name	Schefflera actinophylla 'Amate Golden'	Entry No.	NPS066
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Elstgeest Youngplants		
Description	<p>Schefflera amate Golden is a vibrant new cultivar derived from the classic green amate. Its striking, bright lime-green foliage gives it a fresh and energetic appearance. With the same strong structure and growth habit as its predecessor, this new variant instantly elevates any display with its bold and luminous look. Supplied as young plants or liners, suitable for production year-round. Performs best in warm environments (18–24°C) with medium to high humidity. Requires bright, filtered light and regular watering. The plant is vigorous and uniform, and its bright golden-green colour creates instant visual interest even in early growth stages. Non-flowering; admired for its glossy, bright golden-green foliage. Not winter hardy; indoor or protected outdoor use only. Grows approx. 1.2–1.5m tall and 0.8m wide. Prefers bright, indirect light and evenly moist soil. Perfect for large decorative pots in homes, lobbies, or terraces with light shelter.</p>		
Special features which benefit the consumer	<p>Schefflera amate Golden offers all the robust, reliable growth of the standard amate, but with extra visual impact. The vivid colour attracts buyers from a distance, making it ideal for retail displays. Its consistent growth habit, minimal pruning needs, and disease tolerance make it a cost-effective crop for growers.</p>		
Additional remarks	<p>Suitable for indoor and protected outdoor use in warm climates. Well-tolerated under normal indoor conditions. No major pest or disease issues observed. Perfect for residential and commercial interiors, or seasonal displays in garden centres.</p>

Plant Name	Anthurium Andreanum Melodia® Ibis	Entry No.	NPS020
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Anthura		
Description	With its bright red plumage, the Scarlet Ibis is a striking presence in nature. The vibrant red flowers of the potted Anthurium Melodia® Ibis are no less impressive than this well-known bird. The cup-shaped flowers that dance above the foliage are characteristic of the Melodia series. Flowering all year round, air purifying and easy care. Not in direct sunlight but needs a good light standing place in house. Remove dead heads and stems of the flowers. Peat should not dry out and should be watered once a week.		
Special features which benefit the consumer	Melodia® Ibis is cultivated starting from a pot size of 14 cm. This exotic beauty is quite resilient, as test results show it performs well during a 48-hour transport phase at 4°C. The cup-shaped flowers that dance above the foliage are characteristic of the Melodia series and have a super long shelf life.

Plant Name	Phalaenopsis Orchidaceae Sunca®Pula	Entry No.	NPS021
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Anthura		
Description	Phalaenopsis orchids thrive in bright, indirect light and prefer high humidity with good air circulation. Water them once a week, allowing the potting medium to dry slightly between waterings."		
Special features which benefit the consumer	Sunca® Pula brings the sun into your home with its pink flowers and warm yellow lip. This beautiful Phalaenopsis is named after the city of Pula in Croatia, known for its colourful buildings and stunning sunsets. Sunca Pula has a compact height of 45 cm and blooms profusely with 7 cm flowers. With a shelf life of 3 months, you can enjoy this little ray of sunshine for an extended period! "Phalaenopsis orchids thrive in bright, indirect light and prefer high humidity with good air circulation. Water them once a week, allowing the potting medium to dry slightly between waterings."		
Additional remarks	Stolk Flora try to follow nature as closely as possible in the cultivation of our orchids. We use organic fertilizers and other products, which are good for the plants, but good for bees too. The result is a 'natural orchid'.

Plant Name	Lilium hybrid 'White Starlight'		Entry No. NPS114
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Boltha		
Description	Lilium 'White Starlight' is a compact, flowering lily variety specially bred for indoor and patio use. It features pristine, star-shaped white blooms with a delicate fragrance that adds elegance and freshness to any living space. The flowers are borne on sturdy, upright stems, and the plant remains compact, making it ideal for pots and containers. The dark green foliage forms an attractive contrast to the pure white blooms. 'White Starlight' blooms generously, offering a prolonged flowering period that brings brightness and serenity indoors.		
Special features which benefit the consumer	Compact and elegant – ideal for indoor display. Lightly fragrant white blooms. Prolonged flowering season. Suitable for containers, patios, and balconies. Requires bright, indirect light indoors. Grows well in well-draining potting mix. Easy-care with moderate watering. Non-invasive and neat growth habit.		
Additional remarks	'White Starlight' is best grown in containers in a sheltered spot or indoors. It is relatively low maintenance and has moderate resistance to common lily pests. For best performance, avoid waterlogged soil and place the plant in bright, indirect light. It

Plant Name	Begonia elatior Bountiful pink	Entry No.	NPS118
Entrant	YPHA- Young People in Horticulture Association (Happy Plants Ltd.)	Stand No.	374 & B
Breeder	Beekenkamp Plants B.V.		
Description	It's a compact, semi-trailing Begonia with large amounts of bright pink flowers, extremely suitable for container growing and generally versatile. It's suitable for inexperienced gardeners and can be used indoor or outdoor, and will be content in a shady area.		
Special features which benefit the consumer	Bountiful is suitable for container growing- extremely versatile, suitable for a shady corner. It is low maintenance and self-cleaning, and tolerant of most soil types. We recommend when used as a houseplant it should be planted in a free-draining soil mix, and watered when the soil gets dry. It will thrive outside over 10 degrees, and would prefer a warm room when indoors.		
Additional remarks	Bountiful pink is great as a semi-trailer for a hanging basket, but also an easy-care flowering houseplant for an office. It is truly versatile!

Category	Cacti & Succulents		
Plant Name	Cotyledon Green Footprint	Entry No.	NPS012
Entrant	Javado UK	Stand No.	220 & 227
Breeder	NovoAmi B.V.		
Description	<p>Growers: Cotyledon Green Footprint is supplied as a finished product, ready for immediate display or planting. It thrives in warm temperatures, ideally between 18-24°C. It prefers well-draining soil and requires minimal care. Water sparingly, ensuring the soil dries out between waterings to prevent root rot. Consumers: Cotyledon Green Footprint is a hardy, drought-tolerant succulent with attractive fleshy, green leaves. While it doesn't flower frequently, its unique appearance makes it a standout in any space. Ideal for indoors or outdoors in pots and garden beds. This plant needs full sun and well-drained soil and is perfect for xeriscaping or low-water gardens. However, it is not frost-tolerant and should be protected from cold weather. Ensure it's kept in a sunny spot with minimal watering to maintain its health and beauty.</p>		
Special features which benefit the consumer	<p>Cotyledon Green Footprint is a commercial grower-friendly cultivar due to its low-maintenance nature and resilience. It has a short growing time, reaching maturity quickly, which benefits commercial production. The plant thrives in warm temperatures (18-24°C) and requires minimal watering, making it ideal for efficient production with lower water consumption. Its compact growth habit and unique, attractive foliage reduce the need for extensive pruning or care. The plant's drought tolerance, resistance to pests and diseases, and ease of propagation through stem cuttings further enhance its appeal for commercial growers, ensuring a consistent, healthy product with minimal input.</p>		
Additional remarks	<p>Cotyledon Green Footprint is a low-maintenance, compact succulent, perfect for container growing and small spaces. Its striking green foliage, covered with fine hairs, gives it a soft, velvety appearance. The plant thrives in well-drained soil, requiring</p>

Category	Cacti & Succulents		
Plant Name	Gasteria Mufasa	Entry No.	NPS014
Entrant	Javado UK	Stand No.	220 & 227
Breeder	NovoAmi B.V.		
Description	Gasteria 'Mufasa' is a luxurious, low-maintenance houseplant known for its robust appearance and long-lasting durability. This plant has thick, structured leaves which give it an elegant, modern look that fits perfectly in any interior. Gasteria 'Mufasa' is compact and ideal for both small and larger indoor spaces. It prefers bright, indirect light and has low water requirements, making it especially suitable for busy households or offices. The plant is supplied as a finished product and is resilient to neglect, maintaining its beauty for an extended period. Gasteria 'Mufasa' is the perfect choice for those seeking a stylish, easy-to-care-for plant that adds a luxurious touch to their home or workspace.		
Special features which benefit the consumer	Gasteria 'Mufasa' is ideal for commercial cultivation due to its compact growth and fast development, which shortens the cultivation cycle. It requires little water and is drought-tolerant, minimizing maintenance. The cultivar has strong disease and pest resistance, reducing the need for pesticides. With an optimal temperature range of 18°C to 25°C, it can grow in various climates. The plant easily propagates through cuttings, facilitating multiplication. Its attractive, decorative appearance increases demand, while the smaller leaves allow for efficient packaging and transport. All of these factors contribute to enhanced commercial production.		
Additional remarks	Gasteria 'Mufasa' is highly resistant to common pests and diseases, making it a low-maintenance plant for gardeners. It is a house plant, but when used outdoors it works well in rock gardens, succulent beds, or as part of container arrangements. However,

Category	Cacti & Succulents		
Plant Name	Crassula ovata flame	Entry No.	NPS062
Entrant	Javado UK	Stand No.	220 & 227
Breeder	OVATA bv		
Description	Crassula ovata flame demonstrates exceptional commercial growing characteristics. It shows vigorous growth with faster development than standard Crassula ovata varieties, reducing production time by approximately 15-20%. The cultivar features distinctive jade-green foliage with subtle yellow-green undertones and occasional reddish edges that intensify under cooler temperatures. The thick, succulent leaves are oval-shaped with a glossy finish, creating an attractive full and bushy appearance. The plant naturally forms a compact, symmetrical habit without the need for pruning or pinching, saving labor costs. The cultivar tolerates a wider temperature range (5-30°C) making it suitable for various greenhouse conditions and reducing heating costs. It propagates easily from cuttings with high success rates, ensuring reliable production		
Special features which benefit the consumer	Water The plant only needs minimal water and can survive for extended periods without watering. Moderate watering once every 3-4 weeks is sufficient. Water when the soil is dried out and the leaves begin to feel slightly soft. Light Thrives in bright, indirect light but adapts well to various light conditions. Can tolerate partial shade and even fluorescent office lighting. Avoid direct afternoon sun which may cause leaf burn. Care Extremely low-maintenance plant perfect for busy lifestyles or beginner plant enthusiasts. No special soil requirements - standard well-draining potting mix is adequate. Rarely needs repotting due to slow spreading growth. Natural air purifier that improves indoor air quality. Size Compact size (20-30cm when mature) makes it perfect for desks, windowsills, and small spaces. Dense, bushy growth creates an full appearance even in smaller pots. Durability Tolerates neglect well, making it ideal for travelers or those who frequently forget to water plants.		
Additional remarks	Crassula ovata flame shows excellent resistance to common succulent diseases including Botrytis and Fusarium, making it less susceptible to fungal issues compared to other Crassula varieties. The plant demonstrates good resistance to common pests such as

Category	Cacti & Succulents		
Plant Name	Kalanchoe daigremontiana 'Pink Butterfly'	Entry No.	NPS096
Entrant	PlantLine UK Ltd	Stand No.	68 & 58
Breeder	Unknown		
Description	Kalanchoe daigremontiana 'Pink Butterfly' is a striking succulent known for its vibrant pink plantlets that grow along the edges of its leaves. These tiny, vivid pink offsets give the plant a unique, butterfly-like appearance, hence its name. Unlike the typical green-leaved form of Kalanchoe daigremontiana, 'Pink Butterfly' stands out with its decorative pastel hues and fine leaf margins. While technically monocarpic and short-lived in flowering, its visual interest lies primarily in its foliage and plantlet display, which creates a truly eye-catching presentation for houseplant collectors and garden enthusiasts alike.		
Special features which benefit the consumer	Compact size, ideal for windowsills or indoor pots. Pink plantlets make it a unique collector's item. Easy to propagate from leaf edges. Drought tolerant and low-maintenance. Prefers bright, indirect sunlight. Best grown in well-drained cactus or succulent soil. Needs protection from frost and overwatering.		
Additional remarks	Kalanchoe 'Pink Butterfly' is best suited for indoor cultivation in temperate climates but can also be used in outdoor containers during warmer months. It's relatively pest resistant, though mealybugs and aphids can occasionally occur. The plant thrives w

It is pollinator friendly and a first year flowering perennial with evergreen foliage.		
Special features which benefit the consumer	Erysistible Fire provides striking fiery colours in garden and on balconies or patios. It flowers from March to November and is very attractive to pollinating insects. This plant likes a sunny and dry place and is also suitable for rocky gardens. It has evergreen foliage and is winterhardy up to -12 °C. Place the plants in a sunny or semi-shaded location and water them as needed.		
Additional remarks	Ideal for both landscaping as well as various garden applications such as in borders, pots, etc. Its flower spikes stay compact compared to other Erysimum varieties and therefore Erysistible is also suitable in combinations or lower plantings.

## Vote for Your Favourite New Plant

Visit the central Voting Station in the linkway, and choose your favourite from the 7 winning plants. The Visitor Vote is announced on Thursday morning at 9.15am

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Sunfinity® Yellow Dark Center	Entry No.	NPS032
Entrant	Syngenta Flowers	Stand No.	367 & 370
Breeder	Li Jiang		
Description	Unlike traditional sunflowers that flower once and die, each Sunfinity plant produces hundreds of flowers all season long and has a bushy and upright habit. Sunfinity provides best-in-class landscape performance, making any landscape project more profitable compared to short-lived regular pot sunflowers with flowering windows of 3 weeks. It is a facultative, long-day plant that is easy to program. Suitable for bedding displays, landscaping use and large patio pots and extremely pollinator friendly. In addition, it is the perfect choice for flower picking farms since customers can cut flowers and the plant will continue to flower, unlike one-and-done varieties that need to be replanted. The most suitable pot size is 15-19 cm.		
Special features which benefit the consumer	Sunfinity Yellow Dark Center is suitable for all types of outdoor spaces - from balconies and patios to borders and landscapes. Because of its flowerpower it will continue to flower throughout the entire season - unlike traditional sunflower varieties that have a flowering window of a few weeks. Its flowers can also be used for cut flower purposes and that way you can continue to enjoy your Sunfinity indoors - with a vase life of 8-9 days.		
Additional remarks	Sunfinity is an extremely versatile plant and can be used in landscaping, borders and gardens in full ground and on patios and balconies in pots. A facultative long-day plant that is easy to program.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Pelargonium interspecific Calliope® M Rose Splash	Entry No.	NPS034
Entrant	Syngenta Flowers	Stand No.	367 & 370
Breeder	Li Jiang		
Description	Calliope® M Rose Splash flowers early and is one of the best-selling interspecific Pelargonium series for medium-sized pots and a premium retail offering. It has stunning, bicoloured flowers that do not fade throughout the season. In garden plantings, they spoil the entire season with a multitude of large, semi-double flowers. Just like the other Calliope® varieties, Rose Splash is also a true Heat Lover and can withstand heat and drought.		
Special features which benefit the consumer	Calliope® M Rose Splash will cover your outdoor space with colour, whether it's a balcony or garden. Its colours will not fade throughout the season and it will continue to flower until October. Calliope® M is easy to take care of as it is heat and drought tolerant and it features 'self-cleaning' flowers.		
Additional remarks	Ideal for landscaping due to its heat and drought tolerance and low maintenance. Also ideal for various pot sizes (12-14cm) and combined with other annuals or perennials.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Petunia hybrida Painted Love Purple	Entry No.	NPS035
Entrant	Syngenta Flowers	Stand No.	367 & 370
Breeder	Eric Giesen		
Description	Play with vibrant bicolours for a fun addition to hanging baskets and patio containers. Retailers love such unusual varieties that catches the consumers' attention - Painted Love is sure to be a social media favourite! It's unique bicolour flower pattern and mounding habit make it a perfect plant in both combinations as well as a stand-alone. Painted Love's mounding habit is perfect for hanging baskets and patio containers. This Petunia is tested for outstanding garden resilience and flower stability for continued performance all summer long. It is most suitable for 12-14 cm pots and for hanging baskets or bags.		
Special features which benefit the consumer	Painted Love Purple brings a dramatic new look in gardens and on balconies, in both combinations as well as planted alone. It works well in both containers as well as in hanging baskets or bags. It flowers from April to October and is best placed in a sunny to semi-shaded location. Water you Painted Love Purple when needed and you can continue to enjoy it vibrant colours for months.		
Additional remarks	Works well in various pot sizes and in both hanging bags and baskets. Beautiful as a stand-alone as well as in a combined planter.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Petunia hybrida Itsy Light Pink	Entry No.	NPS037
Entrant	Syngenta Flowers	Stand No.	367 & 370
Breeder	Eric Giesen		
Description	Small but Mighty! Toug and Tiny! Discover the new innovation and explore a new market. With superior branching and a controlled habit, Itsy is easy to grow, also under cold conditions (>5°C). The tons of tiny Light Pink flowers form a blanket of colour - providing undeniable retail appeal. Doesn't matter rain or sun, enjoy the abundance of flowers in beds, hanging baskets, containers or window boxes. Itsy Light Pink has a mounding / semi-trailing habit and works great in combinations as well as a stand-alone. It is most suitable for 10.5- 14 cm pots and hanging baskets or bags.		
Special features which benefit the consumer	Itsy Light Pink is a small-flowered Petunia that covers itself with ton of tiny blooms. It forms a carpet of flowers and is suitable for pots, hangins baskets or bags or in landscaping. It has a great tolerance to heat, drought and rain and is therefor super easy to care for. The abundance of flowers can be enjoyed from April to October.		
Additional remarks	Great heat, drought and rain tolerance make Itsy a true all-rounder in landscapes and outdoor spaces such as gardens, balconies and patios. It can be mixed with other annuals or with the other Itsy colours.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	LaBella Dahlia Grande Chocolate Rose	Entry No.	NPS042
Entrant	Beekenkamp Plants	Stand No.	32
Breeder	Beekenkamp Plants		
Description	Proudly introducing LaBella Dahlia Chocolate, a stunning new dark-leaved dahlia serie that's as captivating as its name suggests! The deep, dark foliage of this LaBella Dahlia reminded us of the luxurious allure of chocolate – and just like chocolate, these dahlias are impossible to resist! Available for the popular LaBella Grande size, 14-17 cm (6-8 inch) pots. LaBella Dahlia Grande Chocolate is easy to grow and can be beautifully combined with other varieties from the Grande Series.		
Special features which benefit the consumer	This LaBella Dahlia is easy to care for. It likes to be in the sun, and the soil should not be too dry. Remove spent flowers and water daily on very hot days. Fertilise once a week and the plant will give large, impressive flowers until late autumn!		
Additional remarks	LaBella Dahlia Grande Chocolate can be placed in a pot or in the open ground. It is also resistant to rain.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Tropical Cordyline 'Magic Star'®	Entry No.	NPS065
Entrant	Javado UK	Stand No.	220 & 227
Breeder	Tuszyńscy Gospodarstwo Ogrodnicze Grzegorz Tuszyński		
Description	Plant is winterhardy till -5°C Compact growing maximum 75cm in the garden. Light condition is half sun half shade. Suitable for garden, pots, beds, and also a indoor plant in a nice pot		
Special features which benefit the consumer	Cordyline australis 'Magic Star' is a beautiful accent plant for pots and containers on the patio or in the Mediterranean garden with its stunning mix of colours in one plant. The green leaves with creamy white edges slowly change into pink shades towards the bottom and intense red on the stem. Cordyline MAGIC STAR retains these unique colours all year round. The growth habit is compact and upright. The plant grows up to 75 cm high and wide. Cordyline MAGIC STAR likes a fertile, well-drained soil and a spot in full sun to partial shade. The plant is maintenance-free and winter-hardy to -5 °C.		
Additional remarks	Sunny to partial shade Likes a sheltered spot, especially against cold winds. Well-drained, light soil. Keep the soil slightly moist, especially in the growing season (spring/summer) In winter: water sparingly, especially if it is outside.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Coleus Solar Flare	Entry No.	NPS112
Entrant	The Farplants group	Stand No.	284 & 291
Breeder	Ball FloraPlant		
Description	<p>Coleus Solar Flare is a visually arresting cultivar highly prized for its intricate and boldly coloured foliage. The velvety leaves typically feature a deep burgundy or plum base dramatically contrasted by bright red or magenta veining and often a striking, frilled margin of golden yellow or lime green. The leaf shape can be variable, sometimes exhibiting attractive lobes or serrated edges. Its upright to mounding and bushy habit makes it a fantastic addition to UK garden beds and containers, providing continuous, vibrant colour from late spring until the first frosts. Benefits for Wildlife/Attraction to Pollinators Pinching off flower spikes, which can occasionally occur, is common practice to maintain foliage interest. Hardiness of Plant: Coleus Solar Flare is a tender annual in the UK climate (RHS H1b - tender in frost). It will not survive UK winter frosts and requires protection if temperatures consistently drop below 7°C (45°F). Typically grown outdoors from late spring to autumn. Tolerance of Adverse Conditions: Thrives best in part sun or bright, indirect light in the UK to achieve the most vibrant colours and avoid leaf scorch, which can occur in intense summer afternoon sun, especially in warmer southern regions.</p>		
Special features which benefit the consumer	<p>Provides vibrant and long-lasting foliage colour throughout the UK growing season (late spring to autumn). Highly versatile for various garden uses, including adding bold accents to borders and creating dramatic container displays on patios and balconies. Good tolerance for part sun, a common condition in many UK gardens, ensuring reliable colour. Relatively easy to care for with regular watering during the growing season. Offers a tropical-like aesthetic to UK gardens without the need for high temperatures. Considerations for the UK Consumer: Tender annual – requires protection from frost and will need to be overwintered indoors in a frost-free environment if desired for the following year. Requires well-draining soil or compost. Performs best in part sun to bright, indirect light. Regular watering is essential, especially in containers and during drier UK periods.</p>		
Additional remarks	<p>Generally exhibits good resistance to common garden pests in the UK when grown in well-drained conditions. Watch out for aphids and spider mites, particularly in sheltered or overly dry conditions.</p>

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Alstroemeria hybrida Inticancha® Mirabel	Entry No.	NPS139
Entrant	Ball	Stand No.	270 & 275
Breeder	HilverdaFlorist		
Description	New bicolour Alstroemeria Inticancha® variety. Great two-toned colour, cherry red and white. For growers: The Alstroemeria Inticancha Mirabel is grown from Rhizomes and supplied in a 40-cell tray. The growing time is early spring, with peak deliveries from week 6 to 16. Cultivation time is around 15 weeks on a 19cm/3 litre pot. For consumers, this variety flowers continuously from spring until the first frost. It is possible to pull out flowering stems and put it in a vase. This also stimulates the Rhizome to create new shoots. Alstroemeria quite like water, it is best to keep the soil moist.		
Special features which benefit the consumer	One of the fastest Alstroemeria on the market in cultivation time, with huge bicolour flowers. Sturdy plants with a high bud count. This variety is suitable for patio and garden plantings. Alstroemeria Inticancha® is often used in landscaping, terrace, balcony, border or pot. Remove old flowers to encourage new ones. Keep soil moist and well-draining. Fertilise regularly.		
Additional remarks	Highly resistant to pests and diseases.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Armeria pseudarmeria Dreameria® Vivid Violet	Entry No.	NPS140
Entrant	Ball	Stand No.	270 & 275
Breeder	Darwin Perennials		
Description	Armeria Dreameria® Vivid Violet is a stunning introduction to the Dreameria® series of Armeria, a traditionally popular 'thrift' used for years to brighten the early spring days with cheerful blooms on sturdy stems. Clump forming and hardy, the Dreameria® series has taken this and moved it on to a season extending perennial flowering from spring to autumn. Armeria Dreameria® Vivid Violet has beautiful, large violet-coloured flowers contrasting well over the dark green foliage which carpets the floor in a tidy habit, perfect for patio containers, garden borders and landscape projects.		
Special features which benefit the consumer	Armeria Dreameria® Vivid Violet has beautiful, large violet-coloured flowers contrasting well over the dark green foliage which carpets the floor covering 12-14" with a height of 10" in flower. It suits patio containers and garden borders flowering for many months with regular deadheading and an application of general fertiliser to keep plants looking fresh in containers.		
Additional remarks	Highly resistant to pests and diseases.

Plant Name	Buddleja davidii Little Rockstars® Red	Entry No.	NPS141
Entrant	Ball	Stand No.	270 & 275
Breeder	Plantipp BV		
Description	Buddleja Little Rockstars® Red is one impressive series of compact flowering butterfly bush! Extremely dwarf plant size makes the Little Rockstars® perfect for pots and containers, mixed planters, or front-of-border plantings. With a naturally rounded habit, this very floriferous series requires little to no care while attracting bees and butterflies from far and wide. The blooms display continuously from summer through to autumn. This is a hardy shrub that will be enjoyed for years to come, growing only to a height of 50cm and a spread of 35cm, easy to look after, reducing the stems by a third in spring and giving a general fertiliser.		
Special features which benefit the consumer	A stunning form of the popular butterfly bush, this Buddleja is richly coloured and compact, superb for patio pot features or use in mixed planters alongside annual bedding, perennial grasses, or foliage plants. Easy to maintain, requiring only a light trim in spring and boost of fertiliser. The blooms will last from early summer in June/July until the first frosts of autumn and will be enjoyed by you and pollinators alike.		
Additional remarks	Highly resistant to pests and diseases.

Plant Name	Gerbera hybrida Garvinea® Sweet Treat	Entry No.	NPS142
Entrant	Ball	Stand No.	270 & 275
Breeder	HilverdaFlorist		
Description	New garden Gerbera, Garvinea® Sweet Treat. The Garvinea® are Gerbera's specially bred and selected for their garden performance. This new variety has bright semi-double pink flowers, with a lot of flowers in the first flush. Garvinea® can be grown year-round under the right conditions and available in tray sizes: 112, 40 and 24. Cultivation time depends on the tray size and is around 10 weeks. Most common pot sizes are 17-19cm, so a 2-3 litre. The Garvinea® series has the one and only true garden Gerbera which will come back as a perennial in the garden.		
Special features which benefit the consumer	This variety is suitable for patio and garden plantings. Garvinea® suits landscaping, terrace, balcony, border, or pot situations. Remove old flowers to encourage new ones. Keep soil moist and well-draining. Fertilise regularly.		
Additional remarks	Highly resistant to pests and diseases.

Plant Name	Calibrachoa hybrida Cabaret® Special Double Purple Bicolour	Entry No.	NPS143
Entrant	Ball	Stand No.	270 & 275
Breeder	Florensis BV		
Description	A complete standalone Calibrachoa, unique on the market. Plants carry a profusion of semi-double flowers intensifying the contrast of colour with a lovely mix of lavender and blue. This truly special colour carries all the attributes of Cabaret® with weather tolerance, but it carries around 20% more vigour than our flagship Cabaret® series. This variety is perfect for late April (once frosts have finished) and through the summer providing continuous flower. Ideal for 9cm through to 1 litre pots and use in patio pots and baskets. Supplied as a Tray 84 and Tray 128 formats.		
Special features which benefit the consumer	With its additional vigour, this is a great performer for the consumer in both baskets and patio containers giving a bigger display throughout summer until frosts. The exceptional bicolour flowers make this really stand out.		
Additional remarks	Easy to grow and free branching, plants continue to grow, fill and spread through once potted up. Will fill and flower neatly in the pot enabling it to present a very tidy high impulse plant for retail sales. Suitable for mixes or on its own for 9-15cm po

Plant Name	Dahlia hybrida Gardenetta® Velvet Crush	Entry No.	NPS144
Entrant	Ball	Stand No.	270 & 275
Breeder	PanAmerican Seed		
Description	A fantastic addition to this relatively new series. Large double blooms display an intense bicolour with a full flower delivering maximum impulse at retail above dark leaved foliage. This introduction to the series continues the same characteristics with fantastic garden performance all through the summer until the first frosts. This variety is perfect for late May/early June sales providing non-stop flower throughout the summer. The pot height is 35-45cm ideal size for 2-5 litre retail sales. Perfect for use in patio containers or the garden border. Will be available in a Tray 84 plug format.		
Special features which benefit the consumer	Stunning bicolour which really stands out in the garden border or in a patio container. Fantastic performance throughout summer. This series is trialled extensively for this purpose.		
Additional remarks	Excellent heat, cool and wet weather tolerance. Good resistance to powdery mildew.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Digitalis purpurea Hanabee Deep Rose	Entry No.	NPS145
Entrant	Ball	Stand No.	270 & 275
Breeder	Takii Europe B.V.		
Description	F1 Digitalis Hanabee is next level breeding and offers superb uniformity and compact growth with the added bonus of a multi-branching habit, giving you more flower than traditional garden varieties. This is one of a series of three seed raised Digitalis presenting three vibrant colours perfect for growers and consumers alike. For the grower, it is easy to grow, dependable for efficient cost-effective production, and transportable due to its compact size, also a first-year flower and no need for vernalisation. For the retailer, it presents many flower spikes with sterile flowers that deliver an extended flower and healthy foliage, with little maintenance required. Suitable for small and larger containers for a huge display of colour, the word 'hanabi' in Japanese meaning fireworks and Digitalis Hanabee delivers this stunning visual effect! Digitalis Hanabee Rose is perfect for 2-3 litre pots, pollinator friendly and offers premium retail appeal.		
Special features which benefit the consumer	Tidy, compact, healthy looking seed raised Digitalis with outstanding flower power created on the multi branching habit. Perfect for 2-3 litre pot display and larger container of mixed plants. General purpose garden compost is perfect to pot these into pots or even front of borders and light deadheading through the season will ensure you maximise the flowering period.		
Additional remarks	Digitalis Hanabee Rose is highly resistant to pest and disease used in border and container gardening.

Category	Annuals, Tender perennials and container & basket plants		
Plant Name	Agastache mexicana Summerlong Lilac	Entry No.	NPS151
Entrant	Ball	Stand No.	270 & 275
Breeder	Darwin Perennials		
Description	Summerlong Lilac is a stunning colourful addition to any retail and garden format. A compact well branched series with aromatic sage green leaves that set off the beautiful pastel shades of the early long-lasting bloom. Agastache Summerlong Lilac grows to about 40cm height with a spread of 40cm and forms a tidy upright herbaceous perennial perfect for growing into a 2 or 3 litre pot, providing early July colour from the bottom to the top of the plant. It also boasts resistance to downy mildew and is particularly hardy, being more tolerant than other varieties to wetter winters. Perfect for pollinators throughout summer and well into autumn.		
Special features which benefit the consumer	Pot in spring as soon as you receive a well-rooted plug, provide with immediate irrigation and pot to soil level, and on finishing, space plants, allowing good air flow and to avoid overcrowding and stretch. The added airflow will help prevent foliar diseases and allow better insect control. We recommend pinching the plant once rooted, leaving 4-5 internodes. We recommend growing in open sided polytunnels. No PGRs required.		
Additional remarks	Highly resistant to Downy Mildew. Plant in ordinary garden compost in containers or borders, attractive to pollinators and deer resistant.
